

At Terrapure, we provide our customers with the industry's most cost-effective and professional environmental solutions. Using safe, reliable processes, we are well equipped to address simple and complex environmental challenges in virtually every industry and with virtually every waste stream.

With dedicated customer service and a sustained focus on health, safety and environmental excellence, we work to minimize waste and maximize the recovery of valuable industrial by-products in our facilities and on customer sites.

DRUMMED WASTE HANDLING

We offer a comprehensive packaged waste service for virtually every industry. We provide sampling and analysis, profiling, classification, packaging, labelling, pick-up, transportation, recycling and disposal. We also provide documentation (manifests and/or bills of lading) to ensure compliance with TDG regulations.

We are able to manage packaged wastes from our customers' sites including labpacks, pails, drums, super-sacks, totes, bins, tub-skids, gaylord boxes and pallets. We are permitted to handle a variety of waste stream classifications such as:

- Class 2
- Class 3
- Class 4 (4.1, 4.2, 4.3)
- Class 5 (5.1, 5.2)
- Class 6.1
- Class 8
- Class 9 including PCB, BCHW (oil, antifreeze), marine pollutants and non-regulated materials
- Non-regulated waste

RECOVERING VALUE AND REDUCING COSTS

We aim to recover valuable resources and reduce the volume of waste for end disposal, thus minimizing liability and costs for our customers. Many of the recovered by-products such as oil, solvents, glycols, paints and chemicals can be recycled into new products or reused as a replacement for virgin materials.

DID YOU KNOW?

- We can customize treatment programs to meet the liability and financial objectives of each client, including providing multiple end disposal options
- We provide custom packaging options (including colours), customized summary reporting and field-level training for safe waste handling
- We provide service on a schedule determined by you, whether on a set interval or an as-needed basis

CUSTOMER LIABILITY MANAGEMENT

Customer Liability Management is fundamental to our service. Our systems, processes and training are designed to ensure compliance with all regulations, including TDG (Transportation of Dangerous Goods).
