**RE: Terrapure to Continue to Provide Critical Public and Allowable Business Services**

Dear Valued Customer:

We are aware of the announcement by the Government of Saskatchewan of the temporary, mandatory shutdown of all non-essential businesses and services in the province related to COVID-19. The initial definition of critical public services and allowable business services includes a number of elements related to waste management and environmental services, as well as business that supply services to other allowable businesses.

The government expects that all critical public and allowable business services will continue to operate and Terrapure plans to do so for the immediate future. This applies to all entities doing business as Terrapure and operating under Terrapure's ownership. For a complete listing, see attached.

As a critical service provider, Terrapure always acts to ensure the health and well-being of our employees, contractors, customers and vendors. Please be assured that we are following all government and public health authority guidelines to ensure our employees are healthy to work and operating safely.

Similarly, we expect our customers and suppliers to take steps to ensure a safe work environment.

We will continue to monitor this situation to determine any further impacts on our business and will advise you of any changes in our operations.

Yours truly,

Terrapure Environmental
